of its energy supply.**

Step by step – from the initial consultation
to securing funding.

EMR H2-HUBS

INDIVIDUAL CONSULTATION FOR COMPANIES: YOUR FUTURE SOLUTIONS FOR A SUSTAINABLE ENERGY SUPPLY.

The EMR H2-HUBs project supports companies in the Euregio Meuse-Rhine region in further developing their energy and production systems to be future-proof and climate-friendly.

The focus is on technology-neutral approaches such as electrification or hydrogen, tailored to the specific requirements of each company, practical to implement, and economically viable.

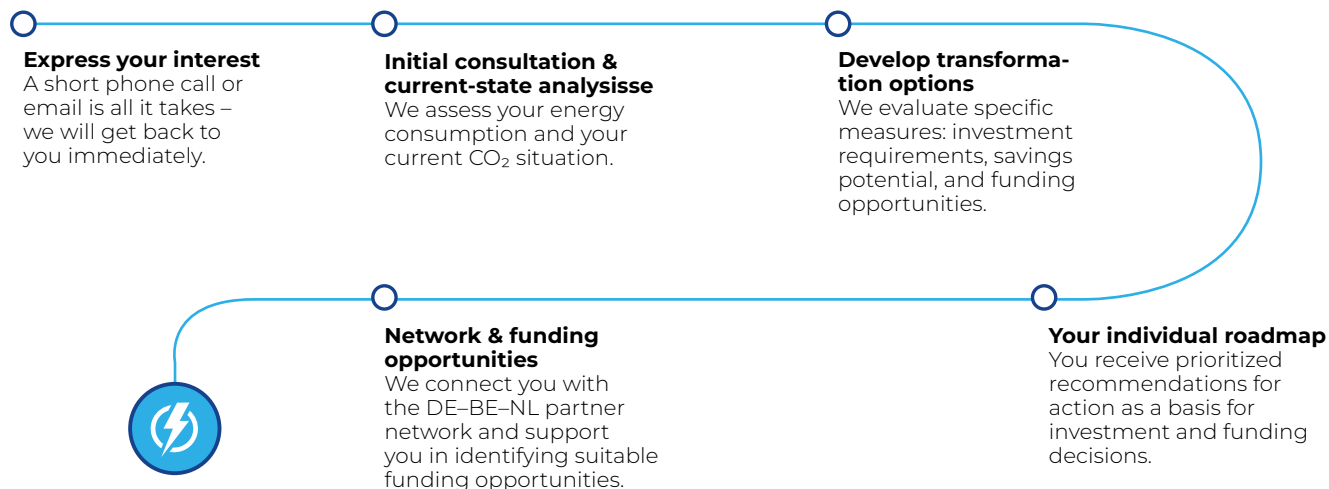

**FREE ENERGY
CONSULTATION
FOR
COMPANIES**
Register now!

Only 100 companies can participate free of charge – secure your place now! Contact us for a non-binding initial consultation.

Professional experts identify your potential for reducing CO₂ emissions and assess how renewable energy can be integrated into your processes in an economically viable and practical way.

**Step by step – from the initial consultation to securing funding.
The consultation includes:**

YOUR BENEFITS AS A COMPANY

- Individual analysis and **concrete recommendations** for reducing energy costs and CO₂ emissions.
- Strengthening **supply security, competitiveness**, in regional, as well as cross-border cooperation.
- A clear **transformation roadmap** with prioritized measures as a basis for investment and funding decisions.
- Professional **expert advice** on evaluating the use of renewable energy.
- Early preparation for future requirements in the areas of **energy, decarbonization, and climate protection**.
- **Exchange** with experts, research institutions, and industrial companies in the Euregio Meuse-Rhine.
